

■ Final Outreach Optimization Deliverable – Week 4

Name: M. Tazeem Sajid

Team: 15

Date: [Insert Submission Date]

1. Final Outreach Optimization Strategy Deck

■ Attached separately as 5–7 slide presentation.

Includes:

- Title, Context & Objectives
- Data Cleaning & Preparation Highlights
- Dashboard Key Insights (KPIs + visuals)
- 3–4 Recommendations
- Next Steps
- Conclusion

■ Video Presentation (5–7 min): Walkthrough of the above deck and dashboard (submitted as .mp4 or Loom/Drive link).

2. Outreach Data Best Practices Guide

■ Data Management & Cleaning – Do's and Don'ts

Do's:

- Standardize key columns (IDs, dates, categories).
- Validate join keys before merging datasets.
- Document every cleaning step.
- Maintain a master table with validated data.

Don'ts:

- Don't ignore nulls or duplicates.
- Don't overwrite raw data (always keep backups).
- Don't create dashboards without validation.

■ Dashboard Design & KPI Selection

- Select KPIs aligned to outreach goals (response rate, conversion rate, applicants).
- Limit top row to 3–5 scorecards for clarity.
- Use consistent color coding (green = positive, red = risk).
- Choose chart type based on story: Time series = trends, Bar = comparisons, Donut = proportions.
- Add filters (region, campaign, caller) for interactivity.

■ Communicating Insights in Business Context

- Use the flow: What → Why → So What (Action).
- Phrase in business language.
- Support each recommendation with one dashboard visual.
- Keep slides minimal: one headline insight + 2–3 bullets.
- Always link insights back to enrollment improvement.

■ Key Lessons for Future Teams

- Data quality first → insights depend on it.
- Dashboards should answer business questions, not just show data.
- Recommendations must be actionable and measurable.
- Treat dashboards as living tools – refresh data, monitor KPIs regularly.

3. Internship Reflection

During this internship, I gained experience in the full data analytics pipeline:

Technical Skills:

- SQL for validation (missing values, duplicates, orphan records).
- Built a cleaned master table from raw outreach and applicant data.
- Designed interactive dashboards with KPIs, filters, and charts.

Analytical Skills:

- Identified patterns in outreach performance.
- Evaluated caller efficiency, applicant distribution, and campaign reach.
- Developed recommendations tied to enrollment improvement.

Communication Skills:

- Learned to convert raw numbers into clear insights.
- Gained confidence presenting findings to a business audience.
- Practiced building structured strategy decks.

Personal Growth:

- My confidence improved in connecting data to decision-making.
- My analytical thinking deepened, as I moved from technical cleaning to strategic recommendations.
- This experience has prepared me for future professional opportunities in data analytics, BI, and decision support.

4. 360° Feedback (Self & Peer Evaluation)

■ To be completed as instructed on the internship platform.

■ Submission Note: This document, combined with the Final Deck and Video Recording, forms the complete Week 4 deliverable.
